

Muhammed Cengiz

Full-Stack Developer

✉ muhammedcengiz2778@gmail.com |  linkedin.com/in/muhammed-cengiz |  github.com/Cengizbey-m |  Greater Toronto Area, Canada |  Canadian Permanent Resident

SUMMARY

Full-stack developer shipping production software people actually use. Built and maintain a booking and payments platform taking live Stripe transactions for a client with a 1.2M-follower audience. On a year-long capstone ranked #1 of 50+ projects, found a critical authentication flaw in the live API and built the gateway, token verification, and rate limiting that closed it. Canadian permanent resident in the Greater Toronto Area.

EXPERIENCE

Full-Stack Developer (Contract) · TheTripMan / Trvoo 2025 – Present
Greater Toronto Area

- Sole developer of a live booking and payments platform for a transportation business with a 1.2M-follower audience, maintained under a revenue-share agreement.
- Integrated Stripe checkout with webhook-driven confirmation, so a booking commits only after payment settles and unpaid reservations never reach the database.
- Replaced DM and phone-based booking with an authenticated admin dashboard, ending the client's daily dependency on a developer.
- Modelled the PostgreSQL schema with Prisma and ship changes against live traffic, with Jest and jest-axe tests enforced by pre-commit hooks and CI.

Tech: Next.js 15, TypeScript, Tailwind, Stripe, PostgreSQL, Prisma, Vercel, Jest

Software Developer, Capstone (Team of 4) · Feather, Sheridan College 2025 – 2026
Oakville, ON

- Ranked #1 of 50+ projects at the 2026 capstone showcase, graded 97/100, delivered over a full academic year.
- Found a critical authentication flaw in the live API: it accepted a client-supplied header as proof of identity, letting any caller read or write any account. Verified it against production before designing the fix.
- Built the API gateway that closed it on Vercel edge functions, verifying Firebase ID tokens against Google's JWKS, discarding client-supplied identity, and adding allowlist routing plus dual-window rate limiting on shared PostgreSQL counters.
- Audited the database, found 12 tables running without Row Level Security including user profiles, and shipped the migration that enabled it.

Tech: TypeScript, React, Vercel Edge Functions, Firebase Auth, PostgreSQL, Supabase, FastAPI, Python, Docker, GitHub Actions

Web Developer (Contract) · Puffy Patisserie 2026
Greater Toronto Area

- Took a local business with no online presence to a launched, mobile-first site, built at phone width first because that is where local discovery happens.

Tech: Next.js, TypeScript, Tailwind CSS, Vercel

PROJECTS

Bloom, Cloud-Synced Life Planner · bloom-cal.vercel.app 2026 – Present
Sole developer and designer

- Launched a complete planner covering calendar, tasks, habits, notes, journal, goals, and a focus timer, live and in daily use.
- Built an offline-first sync layer where writes commit locally and sync to PostgreSQL on a debounce, with Realtime subscriptions propagating edits across every signed-in device and Row Level Security isolating accounts across 10 tables.

Tech: React 18, TypeScript, Vite, Supabase, PostgreSQL, Zustand, Tailwind, Workbox (PWA)

Le Pathétique, Multimodal AI Application · BearHacks 2026
Solo build, one weekend

- Chained Google Cloud Vision, Gemini Flash, and ElevenLabs into one pipeline turning a photo into spoken critique and generated recipes, with an offline fallback so the demo survives a failed third-party API.

Tech: Next.js 16, React 19, TypeScript, Google Cloud Vision, Gemini, ElevenLabs

EDUCATION

Advanced Diploma, Software Development & Network Engineering (SDNE) August 2026
Sheridan College, Oakville, ON

- **Capstone ranked #1 of 50+ projects** at the 2026 showcase, graded 97/100. Coursework across full-stack development, databases, enterprise Java, .NET, iOS, cloud-enabled networks, and network security.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Python, Java, C#, SQL, HTML, CSS
Frontend	React, Next.js (App Router), Tailwind CSS, shadcn/ui, Vite, PWA
Backend & Data	Node.js, Express, FastAPI, REST API design, JWT auth, Stripe, PostgreSQL, Prisma, Supabase, MongoDB
Infrastructure	Docker, Git, GitHub Actions, CI/CD, Vercel, Google Cloud Run, Linux, Jest, Vitest, pytest
Security & Networks	Firebase Auth, JWKS verification, Row Level Security, rate limiting, CORS/CSP, TCP/IP, subnetting, IPv6

CERTIFICATIONS

CCNA IP Addressing & Subnetting · IPv6 Fundamentals (APNIC) · Cisco Introduction to Cybersecurity · LinkedIn: Networking Foundations
