| Full-stack developer who ships production software end to end. Built and deployed a live booking and payments platform solo for a client with a 1.2M-follower audience, now processing real customer bookings. Strong in TypeScript, React, and Next.js, with a networking and security foundation. Comfortable owning a feature from database to deployment.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                         |
