SUMMARY

Full-stack developer with over a year of production experience. As the only engineer on a booking and payments platform for a brand with a 1.7M-follower audience, I replaced manual bookings with Next.js, PostgreSQL and Stripe (11 to 13 bookings in a peak month). Capstone ranked #1 of 50+.

SKILLS

Languages	TypeScript, JavaScript, Python, SQL, C#, Java, Swift, HTML/CSS
Frontend	React, Next.js, Angular, Vite, Tailwind CSS, Zustand, TanStack Query, React Hook Form, Zod, PWA
Backend & Data	Node.js, Express.js, FastAPI, .NET, REST APIs, Socket.io, PostgreSQL, MongoDB, Redis, Prisma
Cloud & DevOps	Docker, GitHub Actions CI/CD, Vercel, Google Cloud Run, AWS, Firebase, Sentry, Jira, Agile (Scrum)
Testing & Security	Jest, Vitest, React Testing Library, pytest, jest-axe, JWT/JWKS, Row Level Security

EXPERIENCE

Contract Full-Stack Developer | TheTripMan **Aug 2025 - Present**

Remote, Ontario | **thetripman.com**

- Replaced manual phone and direct message bookings for a brand with a 1.7M-follower audience with a Next.js, TypeScript and PostgreSQL platform built solo, now handling 11 to 13 bookings in a peak month.
- Ended unpaid reservations: a booking is confirmed only after Stripe's signed webhook reports the payment as settled.
- Built an authenticated admin dashboard over Prisma and PostgreSQL that ended the owner's daily dependency on a developer; paid bookings trigger Resend emails and Google Calendar events.
- Protect releases with Jest, jest-axe and CI before each Vercel deploy, and own production support.

Freelance Web Developer | Puuffy Bakery & Ice Cream **2026 - Present**

Toronto, ON | **puuffy.ca**

- Launched the bakery's first site (Next.js, live hours, 12 unit tests) and fixed five problems an audit found, from a Google block to a form losing every email and an exposed personal phone number.

PROJECTS

Feather, AI Market Insights Platform | Capstone, team of 4 **2025 - Present**

React, TypeScript, FastAPI, Python, Vercel Edge Functions, Firebase Auth, PostgreSQL, Docker | **Live Demo**

- Ranked #1 of 50+ projects at the 2026 capstone showcase, graded 97/100 over a full academic year.
- Closed a hole that let any caller read or write any account: built a Vercel Edge gateway with Firebase ID token verification against Google JWKS, a route allowlist and dual-window rate limiting.
- Revived a CI pipeline that had failed for months (129 lint errors, 5 test failures) and enabled Row Level Security on 12 exposed tables.

Bloom, Cloud-Synced Life Planner | Independent product **2026 - Present**

React, TypeScript, Vite, Supabase, PostgreSQL, Zustand, Tailwind CSS, PWA | **Live Demo**

- Launched a production planner across 7 modules with an offline-first sync layer: writes land in local state before debounced PostgreSQL persistence, with Realtime cross-device sync and Row Level Security isolating every account across 10 tables.

Le Pathetique, AI Cooking Critic Web App | BearHacks 2026, solo build **2026**

Next.js, React, TypeScript, Google Cloud Vision, Gemini, ElevenLabs | **GitHub** | **DevPost**

- Built solo in one weekend: Google Cloud Vision, Gemini and ElevenLabs turn a photo of a dish into spoken critique and recipes, with an offline fallback that survived venue network outages.

EDUCATION

Sheridan College | Oakville, ON **August 2026**

Advanced Diploma, Computer Systems Technology, Software Development & Network Engineering

Coursework: AI & Machine Learning, Cloud Systems, Database Design, .NET/C#, Enterprise Java, Network Security, Linux/UNIX.

Certifications: AWS Academy Graduate, Cloud Developing · CCNA IP Addressing & Subnetting · IPv6 Fundamentals (APNIC) · Cisco Introduction to Cybersecurity
