SUMMARY

Full-stack developer who ships production software end to end. Built and still runs a live booking and payments platform solo for a client with a 1.7M-follower audience, handling 11 to 13 customer bookings in a peak month. 2026 Sheridan graduate, capstone ranked #1 of 50+ projects. Strong in TypeScript, React, Next.js, PostgreSQL, and application security.

SKILLS

Languages	TypeScript, JavaScript, Python, SQL, C#, Java, HTML/CSS
Frontend	React, Next.js, Tailwind CSS, Zustand, Vite, shadcn/ui, accessible UI
Backend & Data	Node.js, Express.js, FastAPI, .NET, REST APIs, PostgreSQL, Supabase, Prisma
Cloud & DevOps	AWS, Vercel, Docker, Google Cloud Run, GitHub Actions, CI/CD, Git, Jest, Vitest
Security	OAuth 2.0, JWT/JWKS verification, Row Level Security, rate limiting, TCP/IP, Linux

EXPERIENCE

Contract Full-Stack Developer | TheTripMan

Aug 2025 - Present

Remote, Ontario | thetripman.com

- Engineered and deployed a booking and payments platform solo for a transportation business with a 1.7M-follower audience, now handling 11 to 13 customer bookings in a peak month under an active revenue-share contract.
- Integrated Stripe Checkout with webhook confirmation, ending unpaid reservations by confirming a booking only after payment settles.
- Built an authenticated admin dashboard over a Prisma and PostgreSQL schema, replacing phone and direct message booking management and ending the client's daily dependency on a developer.
- Shipped to production on Vercel with automated email and calendar confirmations, jest-axe accessibility tests, and CI.

Freelance Web Developer | Puffy

2026 - Present

Toronto, ON | puuffy.ca

- Built and still maintain the site for a Toronto patisserie, taking it from no web presence to a mobile-first storefront now indexed in Google Search and Maps.

PROJECTS

Feather, AI Market Insights Platform | Capstone, team of 4

2025 - Present

React, TypeScript, FastAPI, Python, Vercel Edge Functions, Firebase Auth, PostgreSQL, Docker | [Live Demo](#)

- Ranked #1 of 50+ projects at the 2026 Sheridan capstone showcase, graded 97/100 over a full academic year.
- Identified and resolved a critical authentication vulnerability that let any caller read or write any user account, engineering a Vercel Edge gateway with Firebase ID token verification against Google JWKS and dual-window rate limiting.
- Remediated 12 tables running without Row Level Security, including user profile data, via SQL migration.

Bloom, Cloud-Synced Life Planner | Independent product

2026 - Present

React, TypeScript, Vite, Supabase, PostgreSQL, Zustand, Tailwind CSS, PWA | [Live Demo](#)

- Launched a production planner across 7 modules with an offline-first sync layer: writes land in local state before debounced PostgreSQL persistence, with Realtime cross-device sync and Row Level Security isolating every account across 10 tables.

Le Pathetique, AI Cooking Critic Web App | BearHacks 2026, solo build

2026

Next.js, React, TypeScript, Google Cloud Vision, Gemini, ElevenLabs | [GitHub](#) | [DevPost](#)

- Built a multimodal pipeline chaining Google Cloud Vision, Gemini, and ElevenLabs to turn a photo of a dish into spoken critique and recipes, with an offline fallback that survived venue network outages.

EDUCATION

Sheridan College | Oakville, ON

August 2026

Advanced Diploma, Computer Systems Technology, Software Development & Network Engineering

Coursework: AI & Machine Learning, Cloud Systems, Database Design, .NET/C#, Enterprise Java, Network Security, Linux/UNIX.

Certifications: AWS Academy Graduate, Cloud Developing · CCNA IP Addressing & Subnetting · IPv6 Fundamentals (APNIC) · Cisco Introduction to Cybersecurity
